

Puli Dhanushya

GENERATIVE AI & AGENTIC AI ENGINEER

Hyderabad, India +91 99085 09888 pulidhanushya79@gmail.com linkedin.com/in/pulidhanushya github.com/Dhanushya1974

SUMMARY

Applied AI engineer focused on retrieval-augmented generation and autonomous agent workflows. Builds evaluation and guardrails alongside features: an agent should run against a clear success check, a cost budget, and a human-escalation path. Comfortable owning the stack from prompt design and tool schemas through to deployment, with n8n orchestrating the automation layer.

CORE SKILLS

Generative AI	Context engineering, RAG and hybrid retrieval, structured output, fine-tuning, evaluation, guardrails
Agentic AI	Tool calling, ReAct and plan-execute loops, multi-agent orchestration, n8n workflow orchestration
Frameworks	LangChain, LangGraph, LightRAG
Models	GPT-4o, Claude, Gemini, Llama 3, Mistral, Qwen; vLLM and Ollama for self-hosted serving
Data & Retrieval	MySQL, Redis, Postgres, VectorDB
Languages & Platform	Python, JavaScript, SQL, React.js, Node.js, FastAPI, Docker, Git, GitHub, Claude Code, Claude Cowork, Claude Design

INTERNSHIPS

Generative AI & Agentic AI Intern · TMaxEdTech	Feb 2026 – Jul 2026
- Built responsive React components for an agentic AI chat interface with conversation state management. - Developed Node.js REST APIs integrating LLM providers, with prompt orchestration and tool-calling flows. - Designed normalised SQL schemas for conversation history, sessions and retrieval indexes backing RAG.	
Full Stack Web Development Intern · Pantech Solutions	Jan 2025 – Mar 2025
- Developed full-stack web applications in React and Node.js with responsive UI and end-to-end functionality. - Built RESTful API endpoints connecting front-end components to SQL and NoSQL database layers.	

PROJECTS

BizIntel — AI Business Intelligence Platform	2026
Takes a location and returns ranked business opportunities: competitor insights and market-gap detection feed a recommendation layer scoring which venture types are under-served there. Built the database schema, user management and subscription controls, with n8n orchestrating the scheduled data and notification workflows.	
Royal Occasions — Event Decoration Platform	2026
A responsive platform for an event-decoration business covering service showcases, packages and a project portfolio, with enquiries captured against a custom database schema. n8n workflows acknowledge each enquiry and route follow-up email automatically.	

EDUCATION

B.Tech, Computer Science and Engineering · Mohan Babu University	2022 – 2026 · CGPA 9.32 / 10
Intermediate (MPC), Class XII · Amaravati Junior College	2020 – 2022 · 92.9%
SSC, Class X · Narayana EM High School	2020 · 96%

CERTIFICATIONS

Full Stack Python Programming — SkillCortexAI	Oracle Cloud Infrastructure Foundations Associate
Pattern Discovery & Clustering Analysis — Coursera	Pearson MePro English Certification
